

Raw Materials / Components used at relevant Manufacturing Stages

1. Material receiving area

2. Hollow & Beam cutting

3. Plate shearing and forming

6. Product load testing

5. Electrical Installation stage (before testing)

4. Structural fabrication

7. Insulation Installation Stage

8. Sand blasting

9. Painting

10. Decal /marking and final product

- Offshore Tool Box Container
- Offshore Storage Container
- Offshore Cargo Basket Container
- Offshore Lifting Frame Container
- Onshore Container

VG METAL TECHNOLOGY (M) SDN BHD

Raw Materials / Components used at relevant Manufacturing Stages

1.Material receiving area

2.Hollow & Beam cutting

3. Plate shearing and forming

4. Structural fabrication

5. Dispatch to External Galvanizing and
Receive Galvanized Steel

6. Packing of Galvanized Steel

Final product
-Tent Frame with Accessories
